SUMMARY

Wordpress Developer with 2+ years of experience delivering 65+ websites across e-commerce, corporate, and creative sectors. Skilled in WordPress, JavaScript, CSS, and HTML, with expertise in secure payment integration and Figma prototyping. Adept at transforming client needs into impactful, user-centric designs that enhance engagement. Committed to continuous learning and leveraging the latest technologies to create high-quality, functional, and visually compelling web solutions.

EXPERIENCE

Web Designer, Alkhunaizi Solutions, November 2022 - July 2024
Manama

- Developed 65+ e-commerce websites using WordPress, resulting in a 15% average increase in online sales for clients.
- Enhanced client satisfaction by translating feedback into design improvements and feature implementations, leading to an average client retention increase of 20%.
- Optimized website compatibility by configuring server settings and regularly updating WordPress, plugins, and themes to ensure seamless performance.
- Integrated Google Analytics and other third-party services to provide actionable insights and improve website functionality.
- Conducted market research on emerging technologies to continuously upgrade projects, contributing to a 30% reduction in project turnaround time.
- Troubleshooted and resolved website issues, ensuring minimal downtime and high client satisfaction.

Web Designer, GET - Gulf Equipment & Technology · Internship, July 2021 - September 2021
Nuwaidrat

- Designed and developed website prototypes in Figma, ensuring alignment with company standards and client expectations.

- Converted Figma prototypes into fully functional websites using HTML, CSS, and JavaScript, ensuring quality and responsiveness.
